

The Atoms

Frontend Web Development Course

Q1. Create this HTML table using rowspan, colspan, cellpadding, and cellspacing.

Department	Employee	Shift	
		Start	End
HR	Alice	9:00 AM	5:00 PM
	Bob	10:00 AM	6:00 PM
IT	Charlie	8:00 AM	4:00 PM
	Daisy	11:00 AM	7:00 PM

Explore and use caption, cellpadding, and cellspacing in your table.

Q2. You are the royal scribe of the Kingdom of Code.

Your task: Craft a magical HTML scroll(📜) that reveals three ancient symbols, written using HTML entities only, not by copying the actual symbols.

⚡ (lightning bolt) with a line “⚡ symbolizes power”

♥ (heart) with a line “♥ stands for love”

→ (arrow) with a line “→ guides the way”

Remember: true magic lies in using the correct HTML entities to summon these symbols!

Q3. Semantic Storytelling

Tell a short story (3–4 lines) about how you learned HTML

Use **semantic HTML** tags to structure it:

- **<header>** for the title of your story
- **<section>** for the main content (your story)
- **<footer>** with your name or signature
