

# The Atoms

## Frontend Web Development Course

### Q1. Let's start simple

“Hello World! This is my first web page.”

**Hint:** Use the appropriate tag that browsers recognize for paragraphs.

### Q2. Headings vs Paragraphs – Know the Difference

Organize the following content using proper HTML headings and paragraph tags:

- **Main website title:** TheAtoms
- **Section title:** FrontEnd Development
- **Subsection:** React
- **Description:** “Hey! I am a paragraph.”

### Q3. Link it Up!

Create a clickable link on your page that opens Google when clicked.

**Use the actual URL:** <https://www.google.in>

**Bonus:** Make it open in a new tab!

### Q4. Create a Morning Routine Checklist

Display your morning routine using an HTML ordered list.

- Wake up
- Brush teeth
- Take a shower
- Eat breakfast
- Start coding

**Challenge:** Modify the list so it starts from 5 using the appropriate HTML attribute.

### Q5. Add Audio to Your Webpage

You want to share your favorite song or sound clip on your personal webpage.

- Use the `<audio>` tag in HTML to embed an audio file with playback controls.

**Bonus:** Add a heading above the audio that says: Listen to My Favorite Track.
